

Allison Miller
presents
RIVERS IN OUR VEINS

An immersive, multimedia performance inspired by five great U.S. rivers

"...Miller's craftiness as a percussionist is met by her ingenuity as a composer and group conceptualist." — The New Yorker

NYC-based drummer/composer/teacher Allison Miller presents "Rivers in Our Veins," a new multimedia work celebrating America's waterways and the bio and cultural diversity they carry with them. The multi-sensory experience combines original jazz music with tap dance and video projections, all inspired by the five great American rivers.
